

WATER LEVEL INDICATOR - SMS

GSM based ultrasonic floating sensor. The user needs to insert the SIM and AA alkaline battery. Configure the device with the Empty, middle, full level of the water tank in centimeters and drop it into the water storage tank. The device automatically calibrates the level by itself and starts measuring the water level when it is dropped inside the storage tank and sends the water levels as per the configured level alerts through SMS using the GSM connectivity.

Features

0

Zero installation

Water level
SMS alerts

Clean tank alert

Auto calibrate
with 1 cm accuracy

Easy to replace
AA batteries

Working on hard water
with salt forming
